

Park Vets is one of the oldest companion animal veterinary practices in Cardiff. We are situated just a short walk from The Mill, Canton. We pride ourselves on continuously delivering outstanding service to our clients and their pets.

Our practice in Canton has plenty of parking. Our building is fully air conditioned with separate cat and dog waiting areas. We are in fact one of only a handful of Welsh Vet Practices to have accredited "cat friendly status Silver award" by The International Society of Feline Medicine.

We offer 15-minute consultations from 8.30am to 8pm Monday to Friday, and also offer weekend slots. We have nursing staff on site 24/7 and are able to hospitalise any patients needing overnight care.

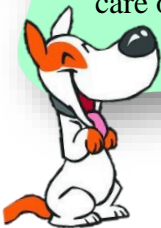

All aspects of veterinary care are available from orthopaedic expertise in a dedicated operating theatre to routine soft tissue surgeries, and dentistry. Our diagnostic facilities include ultrasound and digital radiography, in house laboratory, endoscopy.

Our fully qualified nursing team offer a range of free services to our clients. These have proved extremely popular in helping our clients maintain their pets' wellbeing.

We have visiting specialists in cardiology and ophthalmology. Our doors are always open for you and your pet to pop in and meet our friendly team.

Pet Health Club

Great discounts available to help you with routine care of your pet
